

Junha Park

COMPUTER SYSTEMS ENGINEER

junha7710@gmail.com | [linkedin.com](#) | 02102664932

ABOUT ME

- Computer Systems Engineering student at the University of Auckland with experience in embedded systems, AI integration, and data-driven applications. Skilled in Java, Python, and C, with hands-on experience in PCB design, machine learning, and mechanical fabrication.

PROJECTS

- “Winnie the Boht”

Aug 2025

 - As a team, developed an interactive embedded system robot using servos, AI, and 3D printed components
 - Implemented face recognition and speech detection for user interaction
 - Integrated projection system for dynamic feedback

- Smart Energy Monitor

Jul 2025 - Oct 2025

 - Designed and built a PCB using ATmega microcontrollers
 - Developed firmware in C to measure and display real time energy usage
 - Simulated and tested circuits using LTSpice and Proteus

- Java Projects

2024 - 2026

 - Built a navigation and search application with location lookup and activity recommendations
 - Developed an android app that contains a search engine, implemented UI using XML
 - Implemented shortest path finding using BFS on graph-based map data

- “RoastWorks Coffee Dashboards”

Aug 2025

 - Built a Python + PyQt6 application to automate business performance analysis
 - Implemented forecasting models and automated graph generation
 - Integrated an interactive AI chatbot

MECHANICAL AND PROTOTYPING SKILLS

- Manufacturing and Fabrication

 - Lathe machining, milling, and drilling
 - MIG welding and metal cutting
 - 3D printing and mechanical assembly
 - Iterative design and prototyping

- Fabrication Projects

 - Designed and built a can crusher using metal fabrication and welding
 - Fabricated a mechanical clamp with precision machining techniques
 - Developed various workshop tools: hole punch, toolbox, and phone stand
 - Built an LED display system, integrating basic electronics with physical design

EDUCATION AND WORK EXPERIENCE

- Bachelor of Engineering: Computer Systems | University of Auckland

2024 - Present

 - Expected Graduation: 2028
- Calculus and Physics Tutoring | NCEA Level 1

2023 - 2024

TOOLS

- Languages: Java, Python, C , VHDL
 - PyQt6
 - MATLAB, Altium, Fusion 360, MicroChip studio, Questasim, LTSpice, Proteus
- Ollama, LLM and Prompt design
 - Machine Learning
 - Microcontroller programing
 - Figma

AWARDS

- 3rd Place - ECSE Design Competition 2025
